Discussions

- Broodstock management
- Induced breeding
- Seed production
- Nursery production
- Grow-out operations
- Fish processing operation

ABOUT THE TRAINING

Why join the catfish training course?

- Catfish can be cultured with minimum inputs.
- Catfish has high tolerance to poor water quality.

What can be learned from the course?

Participants will gain technical knowledge and skills on broodstock management, induced spawning, nursery, and grow-out culture of catfish.

Course objectives

1. To be able to select suitable sites for the establishment of a hatchery, nursery, and grow-out culture systems of catfish.
2. To learn the techniques for induced breeding of the species.
3. To mass produce high quality fingerlings in the hatchery.
4. To grow the species in nursery and grow-out culture systems.
5. To learn how to monitor water quality parameters in the culture system and its management.
6. To be knowledgeable on diseases affecting catfish, diagnosis, prevention and control.
7. To learn the world standard of fish processing.

What to expect at the training center?

Osky Integrated training courses on freshwater species are conducted at Igbara-Oke Freshwater Station (IFS) that is equipped with lecture rooms, land-based, and lake-based cages. Osky also has a library that the trainees can use for their research.

ACCOMMODATION

Participants will stay in our housing units. Each unit has fan, bedrooms with six single beds, a toilet and bath.

All units are furnished with television, refrigerator and cooking wares and utensils. For more details and reservations, please contact Mr. Femi Ilesanmi Eniola +234-815-761-1545 or e-mail at hello@oskygroup.com

FOOD

Food can be arranged from local cook or food caterer on a per order basis. Trainees can also cook food on their own, since cooking wares and utensils are provided in each unit. Training applicants are advised to make prior arrangements since there is no canteen inside the station or restaurants nearby.

INTERNET

The lecture room is provided with Wi-Fi internet connection. Internet access during lectures is not available so as not to disrupt the training session.

SECURITY

CCTV and Security guards are on duty 24 hours a day inside the station premises
